

Create Bioma Modelling Solution

CLIC Setup files and Tutorial

Version	1.0
Date Published	20/05/2015
Last Update	20/05/2015
Title	Create Bioma Modelling Solution Tutorial

PROPERTIES

Description	This resource includes the setup files of the CLIC tool. A tutorial shows how to use the CLIC application to create a new Bioma modelling solution by connecting existing components. This tutorial is targeted to the advanced users of the BioMA Framework who want to compose components to create their own modelling solutions. It is recommended that the user completes the "Create a Bioma Component Tutorial" before starting this one.
Disclaimer	The developers/maintainers of this software do not have any responsibility on its use and on results/products derived from it.
Licence	http://bioma.jrc.ec.europa.eu/components/componentstools/airtemperature/help/License.html
Instructions	Download the ZIP file that includes a PDF with step-by-step instructions on how to complete the Tutorial, as well as all the required tools and files (software and/or code). First follow the instructions in the PDF file to install the tools.
Documentation	Self-contained in the zip file
Domain	Agronomical models simulation.
Typology	Application
Author	JRC/IES/MARS
Reference Web Site	http://bioma.jrc.ec.europa.eu/gstarted.htm
Format	Compressed as ZIP file.
File Name	TrainingCreateModelingSolution.zip
Size	26 MByte
